

ABOUT KUSAMALA

The Kusamala Institute of Agriculture and Ecology (Kusamala) is a local, non-governmental organization that promotes household-level permaculture and agroecology systems in Malawi through demonstration, education, outreach and advocacy.

Founded in 2009, Kusamala houses Malawi's largest permaculture demonstration site, **Nature's Gift Permaculture Centre**. Through the Centre's demonstrations, Kusamala educates individuals and communities on how to improve nutrition, income generation and environmental health.

Through grants and programs, Kusamala conducts outreach, research and advocacy with the aim to show the viability of permaculture as a local and national agricultural strategy.

In a country where 80% of the population are subsistence farmers, Kusamala demonstrates how locally available resources can meet human needs while improving the quality of life of people and the environment.

Organic produce from our vegetable garden

CONTACT US

For more information about our courses, our gardens, or to book a guided tour with a permaculture trainer, please email: info@kusamala.org

Sign up for our weekly **veg box** program and enjoy fresh produce from our gardens. Contact: garden@kusamala.org

Find us at the farmer's market at the Sanctuary Lodge every last Saturday of the month, and at Kumbali Cultural Village Flea Market every mid Sunday of the month.

TOUR GUIDE MAP

This leaflet is yours to keep. It is designed to guide you through our permaculture demonstration centre and provide you with information about our work.

Use this map to find the 15 stations on the property that correspond to the highlighted demonstrations on the map.

At most stations you will find sign posts that give you more information about each of the demonstrations.

Please do not walk on plant beds or off the paths.
Please lock gates or doors as you find them.
Please drop litter in the bins provided.

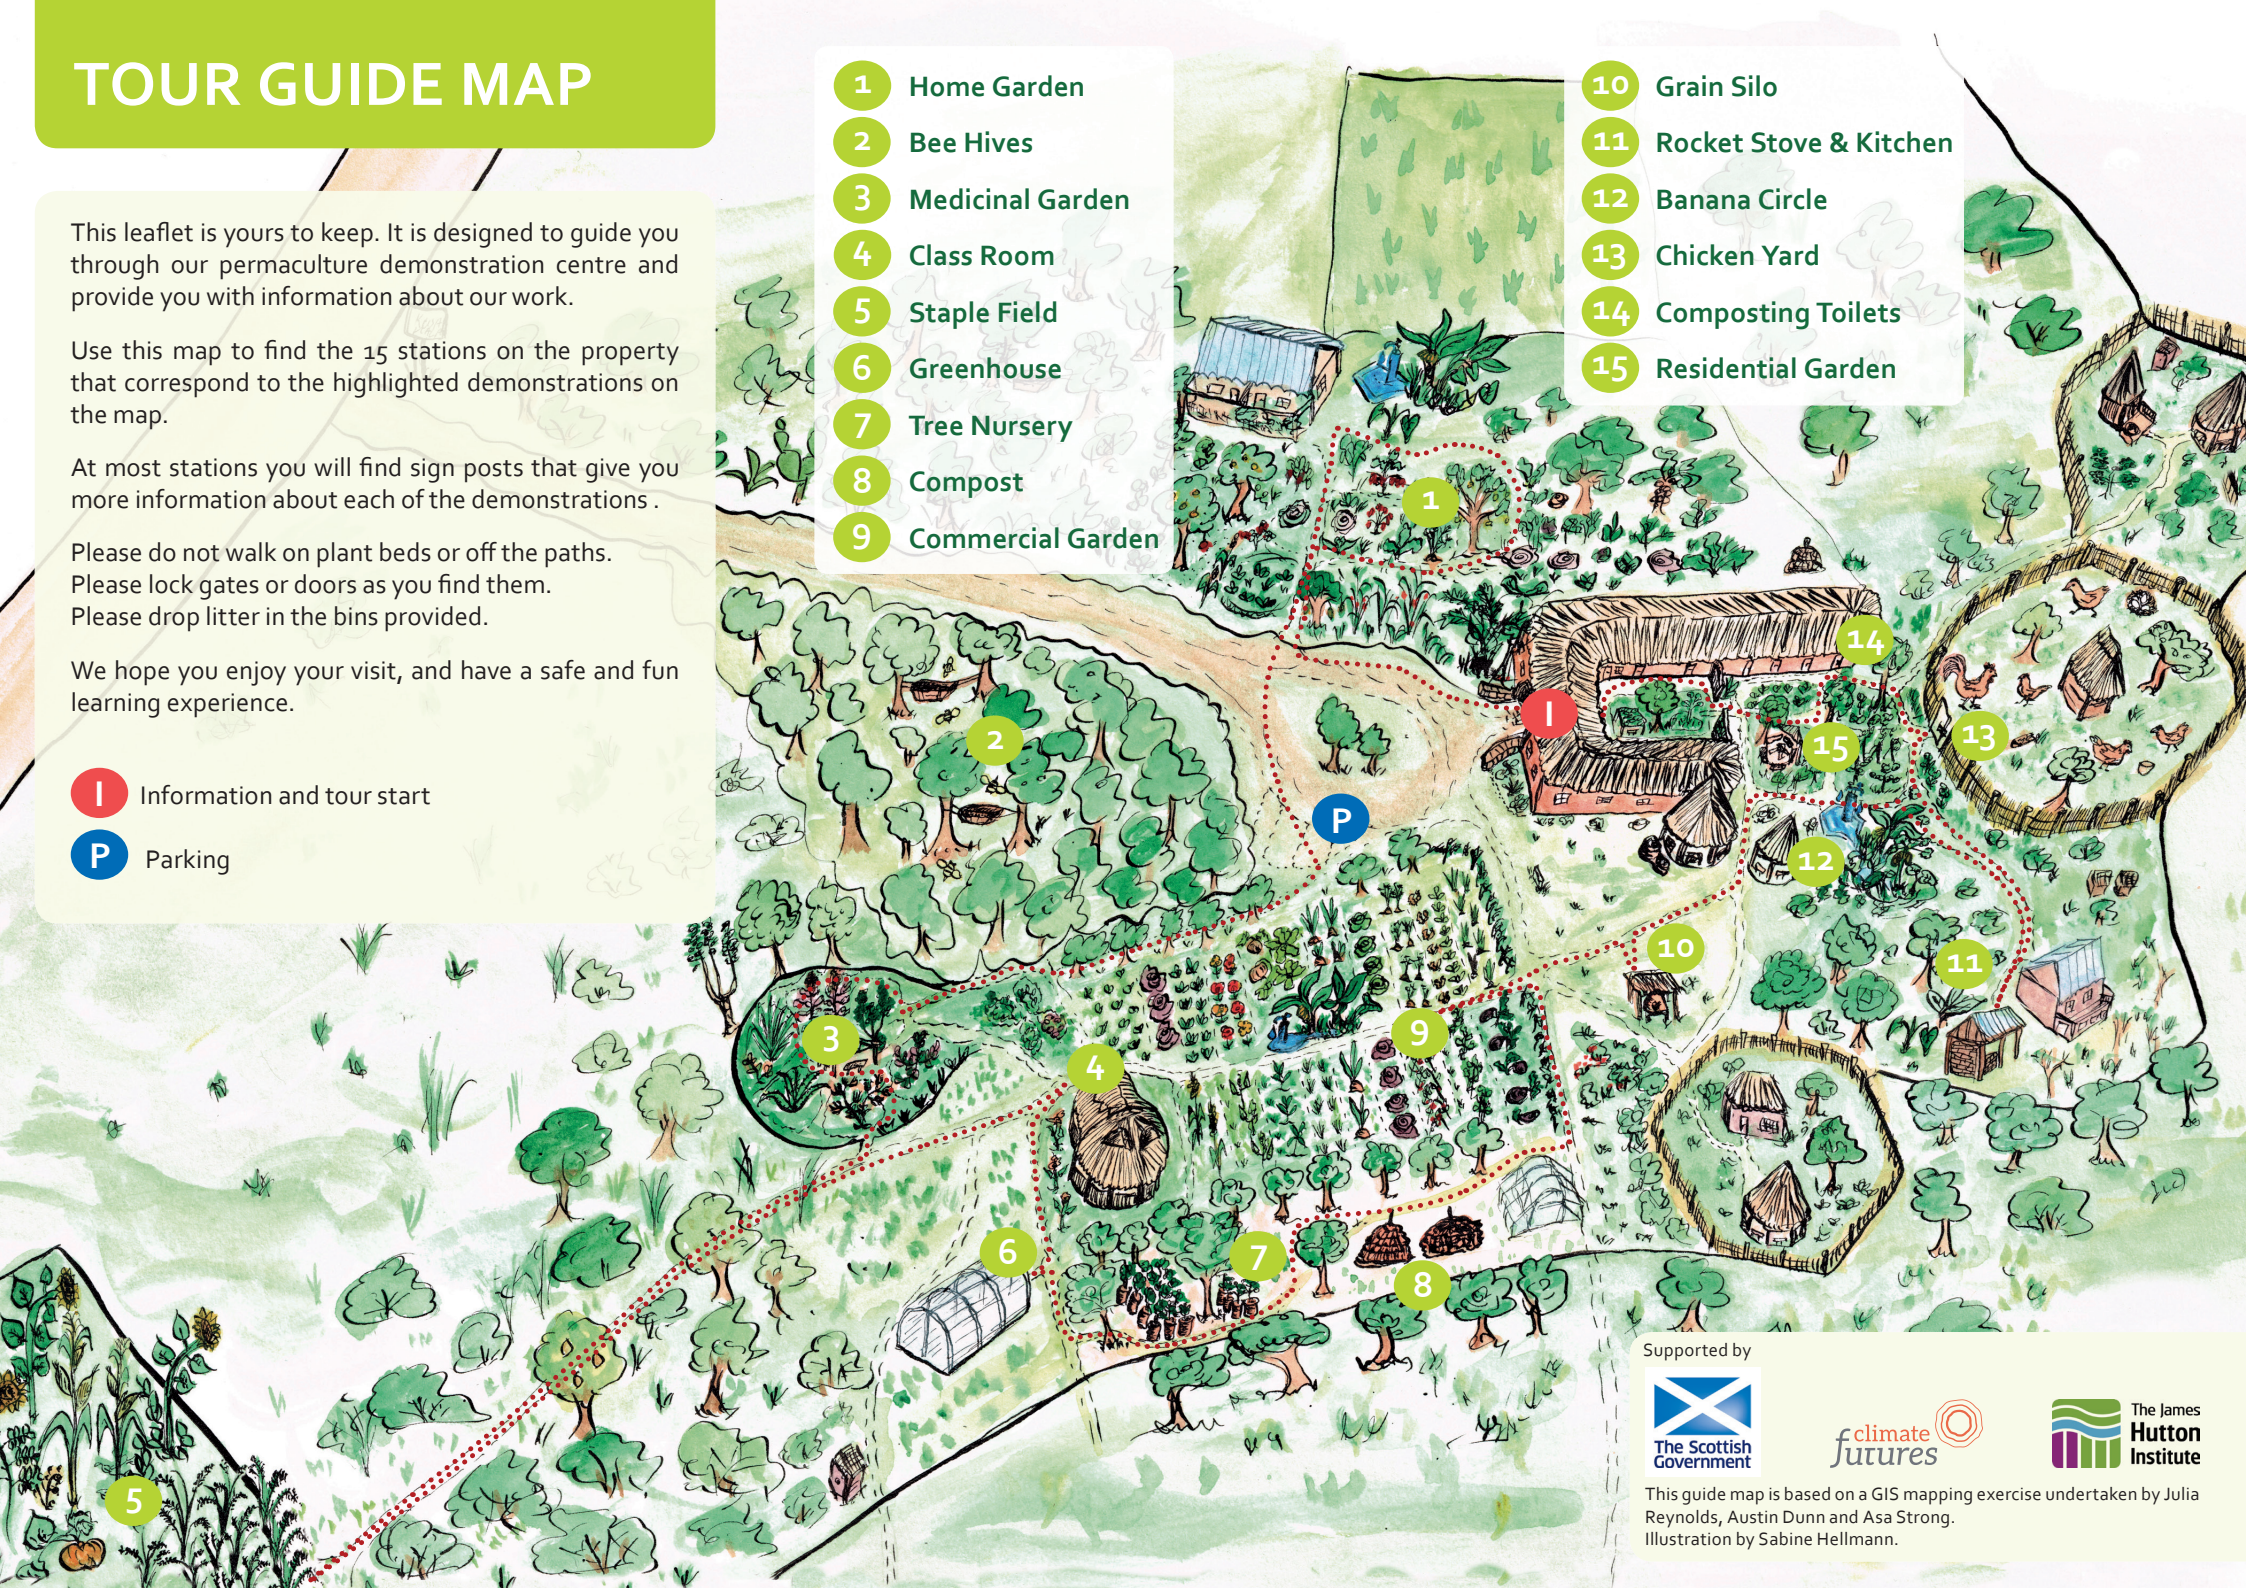

We hope you enjoy your visit, and have a safe and fun learning experience.
